

# Project Fact Sheet

## COMOX Project

Evaluating the travel, health, and social activity impacts of Comox-Helmcken Greenway improvements

This study evaluates the travel, health, and social activity impacts of the City of Vancouver's Comox-Helmcken Greenway improvements.

The Comox-Helmcken Greenway is an important east-west connection through Downtown from False Creek to Stanley Park for pedestrians and cyclists of all ages and abilities.

Phase 1 results from the City of Vancouver indicate:

- + 16%** increase in the number of people undertaking moderate physical activity
- + 49%** increase in the number of cycling trips
- 35%** decrease in the number of vehicle trips

The Greenway project provides the following benefits to residents and visitors:

- connects existing amenities
- provides places to sit and rest
- improves pedestrian and cyclist safety
- beautifies the street with greenery

PROJECT DATES: 2012 to 2017
